ASSOCIATE EDITOR

If you have a technical education, now work in the aerospace industry, have considerable experience in writing and editing, and desire a new and challenging kind of job, this opening may be for you. An associate editor for *Space/Aeronautics* solicits, develops and intensively edits technical articles by industry and government experts, maintaining close contact with the authors throughout. He also researches, writes, and develops the illustration for his own articles. While his own technical background is quickly utilized, he begins immediately to educate himself in other areas, eventually qualifying himself as a technical journalist with a broad view of technology and the aerospace industry. He is ordinarily based in New York City but does considerable travel. Starting salary runs about $12,000 to $15,000, depending on experience. If you are interested in exploring such a position, please send chronological resume, including present salary, and a few samples of your best writing (not necessarily technical) to: *Space/Aeronautics,* 205 East 42nd St., New York, N.Y. 10017, Attn. J. B. Campbell. Please include your home and business phone numbers. All communications will be treated confidentially.
